CO2 Offset

Water is collected from polluted sources and, in order to make it safe for consumption, it has to be boiled first. This process leads to deforestation as wood is the main fuel source in many developing countries. Furthermore, the process of burning wood is bad for the (indoor) air quality leading to many respiratory issues. The Water Projects give households access to clean water, protecting forests, improving health conditions and [The Water Projects](#) saving time and money.

Here, you will be able to select how much you would like to contribute towards this effort by way of compensation based on your means of transportation and the average calculated for you by the [greentripper calculator](#).

You will have the choice between the below options. The option you select will be added to your registration and processed via your selected payment method. After the 30th ITS World Congress, the organisers will transfer all received funds directly to the project mentioned above.

68 kg

Representing an average of CO2 produced by travel per public transport and 2 overnights

€1.36 each

Select ▼

181 kg

Representing an average of CO2 produced by travel per private car and 2 overnights.

€3.64 each

Select ▼

1.04 tonnes

Representing an average of CO2 produced by travel for a 2hour flight and 2 overnights.

€20.90 each

Select ▼

1.08 tonnes

Representing an average of CO2 produced by travel for a 2hour flight and 4 overnights

€21.71 each

Select ▼

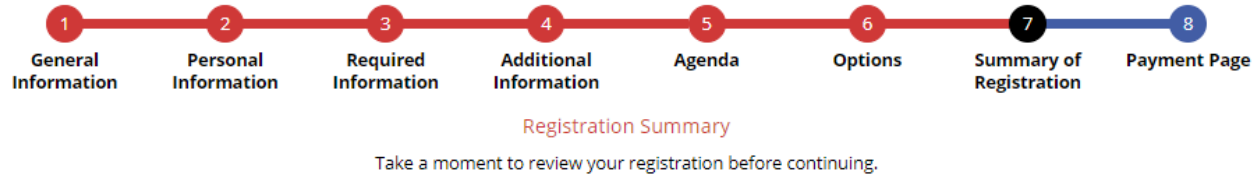

2.06 tonnes

Representing an average of CO2 produced by travel for a 4hour flight and 3 overnights.

€41.41 each
